# AIR CONDITIONING MAINTENANCE

---

Air quality can be affected by the condition of your air conditioning unit, causing respiratory problems to all those living in your home or office. Dust particles, bacteria and even mites can be transported into your property through your air ducts which need to be regularly cleaned. Cleaning the filter every few months can prevent allergy aggravation and breathing problems. Cleaning your air conditioning unit keeps it working to the best of its ability, also minimizing unwanted odours.

WHAT YOU ARE BREATHING  
IN YOUR HOME/OFFICE?

# MECHANICAL, ELECTRICAL AND PLUMBING MAINTENANCE

---

Mechanical and electrical faults can occur at any time, compromising the working condition of your home or office appliances and fixtures. From lighting to home entertainment systems, each item is at risk of faulting by even the most minor of complications. Electrical flaws can be caused by moisture, bad wiring, construction errors and even the heat, and are worth checking for regularly, particularly to reduce the chance of a fire in your home or office.

Plumbing issues can occur at any time, from a blocked drain to a faulty toilet, a leak to a rusty pipe. What can start out as a minor issue can soon become a bigger problem, such as a flood or stagnant water. Our plumbers are prepared for any eventuality.

# PAINTING AND CIVIL WORKS

---

From structural damage to minor cracks, fractures to retouches, our team will repair all jobs to ensure stability and ensure you get the most from your home or office. Even minor damages to the building can compromise your air quality, power efficiency and temperature of your living quarters. Professionals will survey any potential damage and provide reasonable quotes to help you.

Fully equipped to decorate your rooms to your style, our professionals guarantee a quality finish from floor to ceiling. Painting and repainting, whether you are freshening up your walls or moving properties, will ensure your home or office is at its best.

## PEST CONTROL

---

The smallest critters can cause the biggest problems; infestations, spreading germs and even bacteria. Ants, termites, cockroaches, flies, rats and mice can all be removed by our trained professionals.

## FIRE SYSTEM MAINTENANCE

---

Guaranteeing your fire system is working properly makes all the difference in the case of an emergency. Ensure alarms sound when needed, and pipes and sprinklers release water in the event of a fire to keep you and your family safe.

These activities will be carried out by an individual Pest Control and Fire Systems Maintenance Teams under management and monitoring of APlus Services Team which will give you the following advantages:

- Professional reporting on the work carried out
- Easy monitoring and follow-up on the activities undertaken
- Single point of contact

# DEEP CLEANING SERVICE

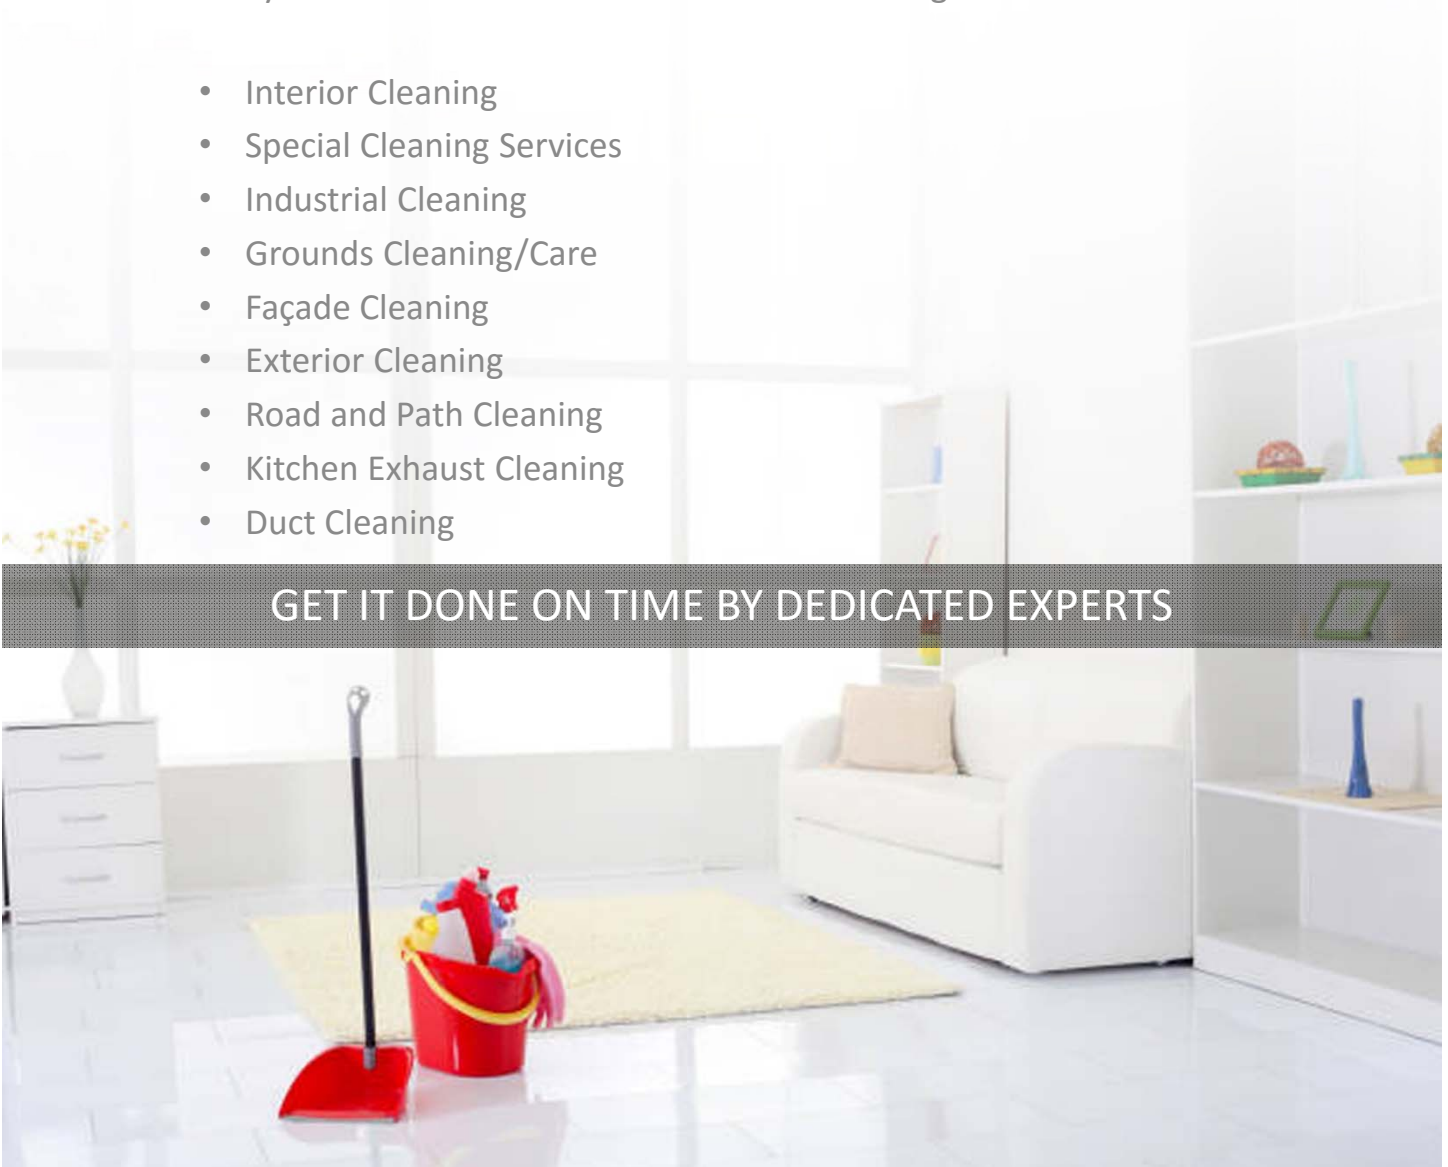

---

Our deep cleaning team will not only remove surface dirt from all areas of your home and office but provide a service that will eradicate bacteria and grime. The specialized team will cover every environment and even appliances to ensure your home or office is spotless and professionally cleaned.

With industrial equipment as well as eco-friendly products, we will ensure your environment receives the most thorough clean.
